## [Reuters - Massachusetts explores funding options](#)

Massachusetts' state treasurer has asked the federal government about borrowing money under similar conditions that banks have received if the state runs into financial trouble during the current financial crisis. "I hope that the money won't be needed," Rep. Barney Frank, a Massachusetts Democrat and the powerful head of the House Financial Services Committee, told Reuters on Monday. "But if it is, there is no better borrower than the state," he said. Treasurer Tim Cahill last week explored the possibility of going to the Federal Reserve to borrow money if needed.

**Comment** - It is tempting to joke about two "blue states" asking for a bailout. However, as the two charts below show (same series, different time periods), the muni market is in chaos again. General obligation bonds as a percentage of Treasury yields are at their highest level ever. The previous record was during the Bear Stearns failure, which led directly to the Auction-Rate Securities (ARS) implosion.

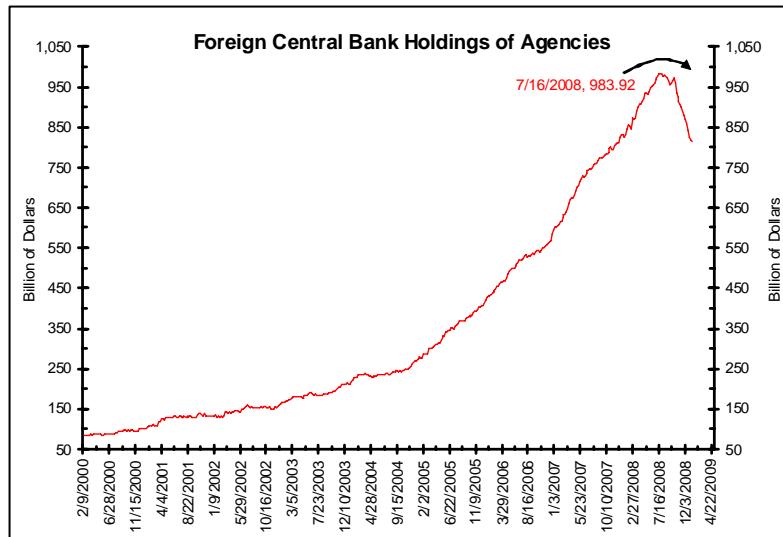

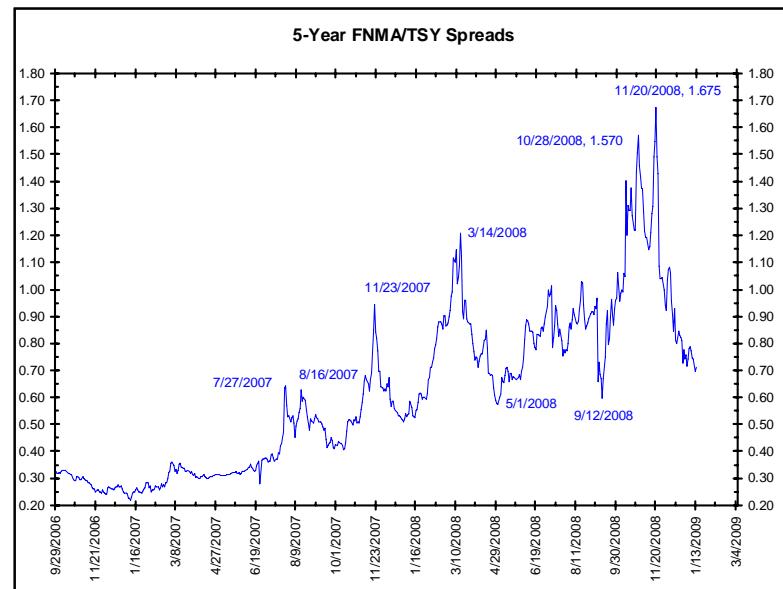

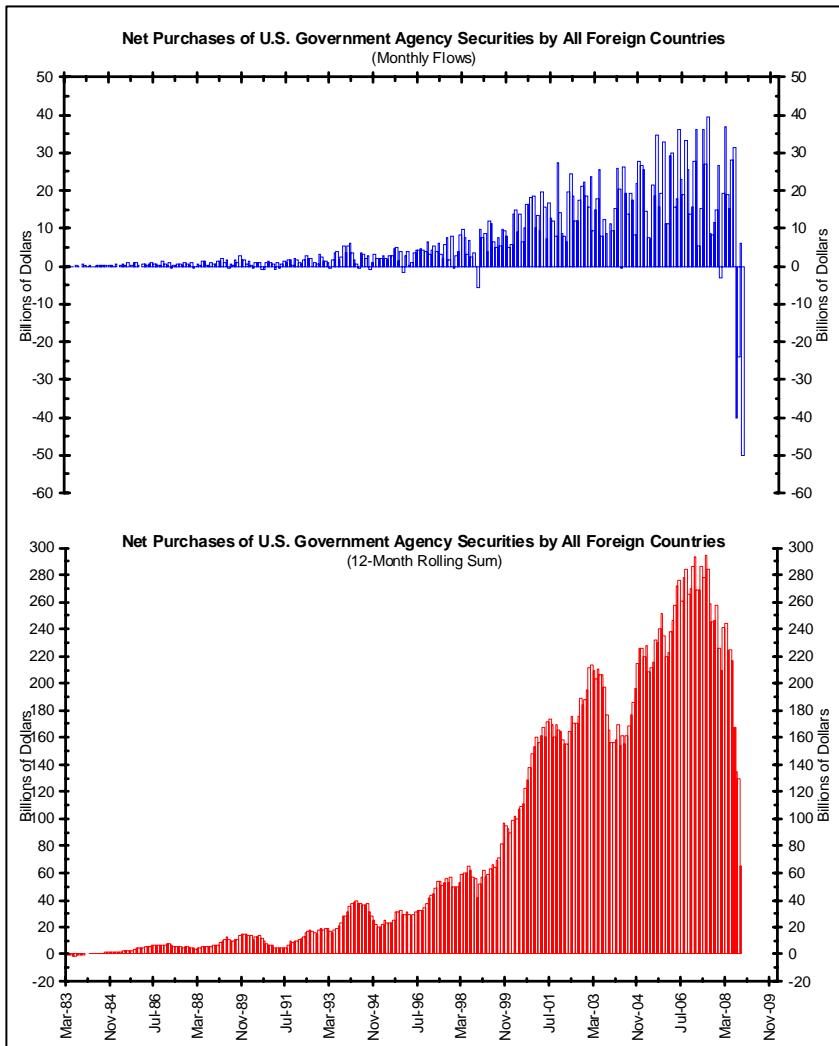

Add munis to the ever-growing list of crisis markets.

## [Bloomberg.com – Joe Mysak: Begging for Bailout Cash, U.S Cities Told to Go Fish](#)

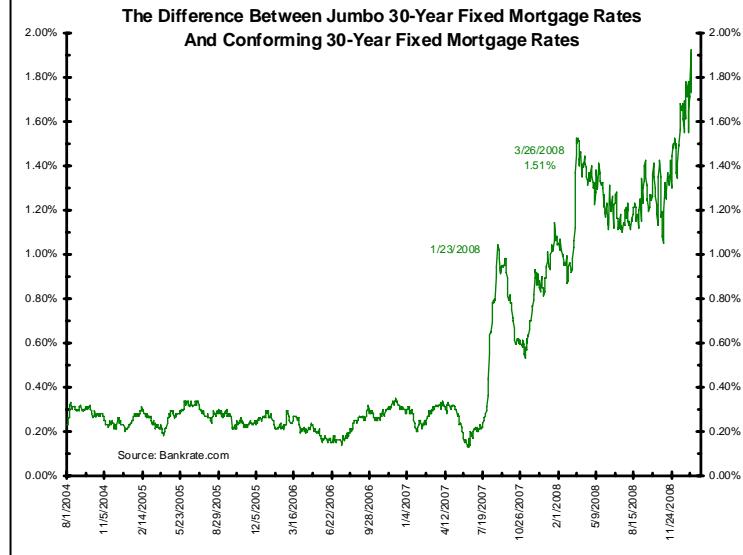

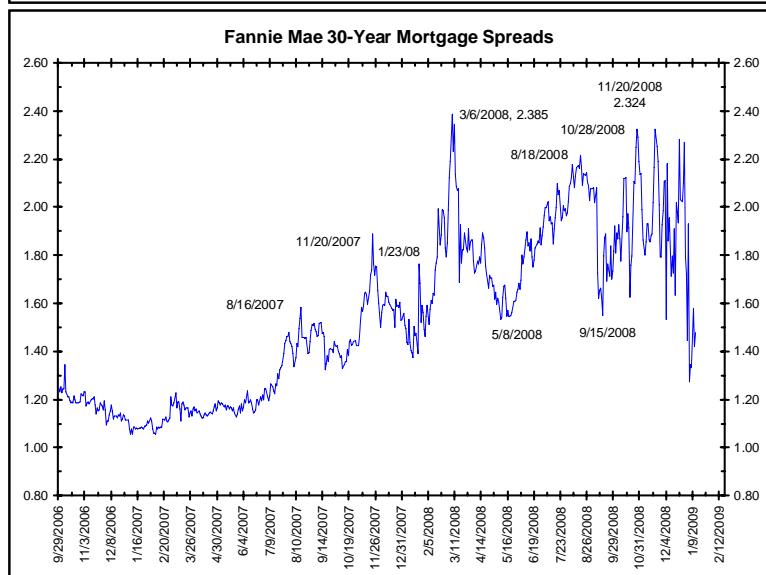

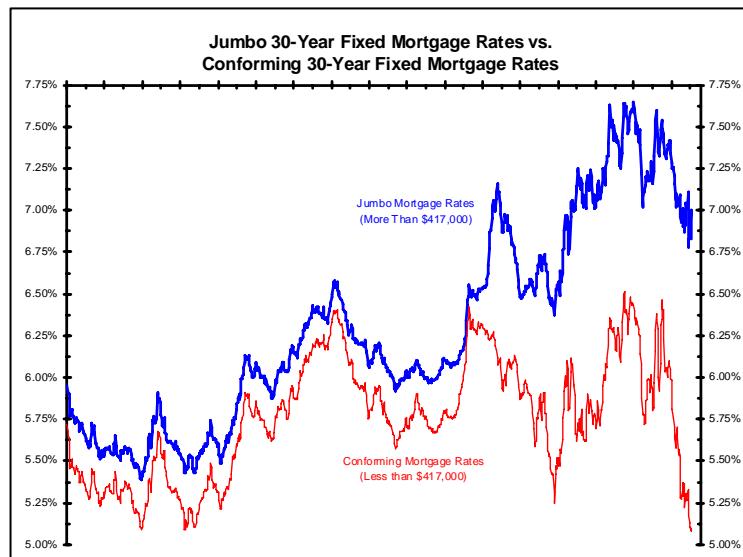

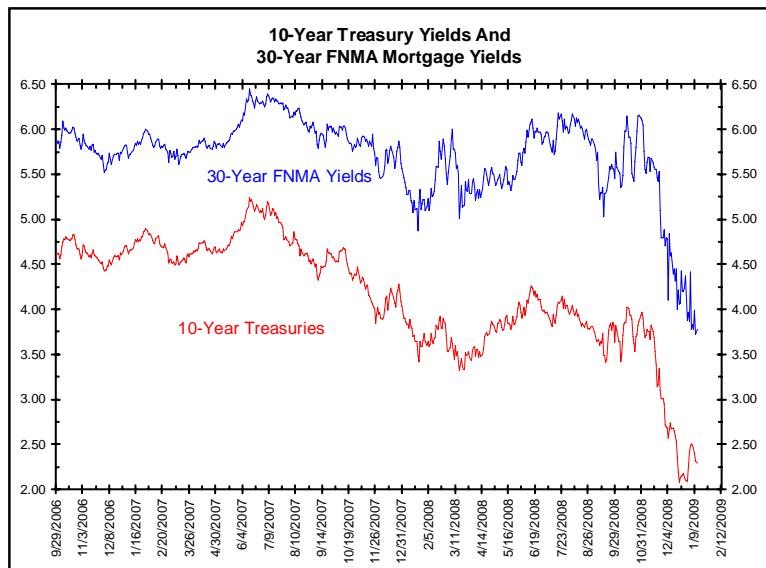

Atlanta, Detroit, Philadelphia and Phoenix have all asked in recent days for some of the Troubled Asset Relief Program billions. You can expect more to ask. Some want the government to spend the money on infrastructure-construction projects and to buy short-term note issues to help tide them over. Others want the money to help pay for employees and mass transit, among other things. Whether you're a municipal bond investor or simply a taxpayer, this should make you feel a little queasy. **This isn't good news.**
